THE REFACTORY PROGRAM

Refactory gives you an intensive introduction to tech. You will learn both the technical and non-technical skills required to meet the demands of a tech industry that competes globally. The technical modules are designed together with ICT companies and follows industry standards and best practice methods.

How does it work?

We have developed a program that takes you from zero to job-ready in 9 months. The program consists of 3 steps

Step 1: Catalyst Course

A focused three-month program that includes training in leadership, critical thinking, IT project management, as well as introductions to different technologies.

Step 2: Bootcamp

A six-month boot camp, where a key component is practical learning through projects with industry partners.

Step 3: Last Mile Program

A program that gives graduates the opportunity to work at an elite ICT company for 6-12 months.

Tuition fees: 1,500,000

Reg Fees: 200,000
